

Extend2Fit™ 3-in-1 Car Seat

The American Academy of Pediatrics recommends children ride rear-facing until at least two years of age or until they have reached the maximum height and weight limits of their rear-facing car seats. The Extend2Fit™ 3-in-1 Car Seat features a 3-position extension panel that provides 5" of extra legroom, allowing your child to ride rear-facing longer. Parents can feel good that this car seat provides added comfort and, most importantly, enhanced safety for all the car rides ahead.

5" of Extra Legroom

A 3-position extension panel provides 5" of extra legroom. Working in tandem with the 6-position incline, this allows baby to safely ride rear-facing longer and more comfortably.

Fuss-Free Harness Storage

The Fuss-Free Harness Storage holds the buckle out of the way, making it easier to get baby in and out.

Simply Safe™ Adjust Harness System

Simply Safe adjusts the height of the harness and headrest, in one motion, without having to rethread the straps. 10 different positions make it ideal for your growing child.

Steel Reinforced Frame

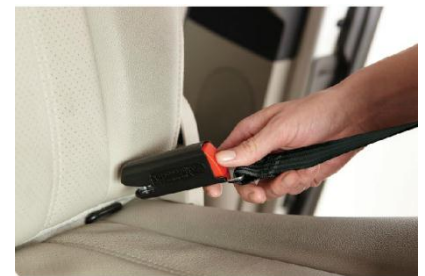

Steel reinforced frame provides strength and durability for up to ten years of use.

Level Indicator

Easy-to-read level indicator for hassle-free installation.

InRight™ Latch

Provides a one-second latch attachment.

Recommended Use:

- Keeps rear-facing infants and toddlers harnessed 4 – 50 lbs.
- Keeps forward-facing toddlers harnessed 22 – 65 lbs.
- High Back Belt Positioning Booster 30 – 100 lbs.

Pricing & Availability:
